

GROUNDWATER REPLENISHMENT SYSTEM

A PURE SOLUTION TO ORANGE COUNTY'S WATER NEEDS

Tell Us What You Think

As Orange County prospers, the demand for safe, reliable drinking water will increase. Unless we begin looking now at innovative ways to secure alternative sources of water, there will be shortages in the years ahead. The Groundwater Replenishment System is an innovative project that will improve local water quality, make our water supply more reliable, and provide us with local control over part of our water future.

The Groundwater Replenishment System will take highly treated sewer water and purify it to levels that meet or are better than state and federal drinking water standards. It uses a three-step process that includes reverse osmosis, which is used by manufacturers of bottled water. The purified water will be used in a seawater barrier that protects our groundwater from intruding ocean water. It will also be pumped to percolation lakes in Anaheim where it will seep into the groundwater basin and blend with Orange County's other sources of groundwater, following the same natural filtering path rainwater takes through the ground.

CHECK ALL THAT APPLY

- I support the need for new, locally controlled water supplies for Orange County.
- I would like to be listed as a personal supporter of the Groundwater Replenishment System.
- Please keep me informed about the Groundwater Replenishment System and other Orange County water issues. (We will not share your address.)
- I belong to a club or organization that would like to hear a presentation about the Groundwater Replenishment System and future Orange County water issues. Please contact me.
- I would be willing to help schedule presentations to organizations, businesses, homeowners associations, etc.
- I would be willing to learn more about the Groundwater Replenishment System and help with outreach.
- I would like to write a letter of support for the Groundwater Replenishment System.

Please share your comments or questions about the Groundwater Replenishment System. We will respond to all questions.
